This index to the recordings posted by Jonathan Marks on his Media Network Vintage Vault website has been prepared in order to provide another way, besides the website’s search box, to find recordings on particular topics. Jonathan has posted programs to the Vintage Vault every year since 2010 (except 2017), and continues to do so. This index covers all the programs posted through December 31, 2020. Jonathan is a hero for preserving this priceless collection of media material.

Each of the hundreds of programs in the Vintage Vault has a written summary description prepared by Jonathan. The summaries appear on the Vintage Vault website, and the entries in this index are based on those summaries. Some summaries are detailed, others more general, and the index reflects this. In a few cases I have gone back to the recordings to clarify an item, but in general I have relied on the text of Jonathan’s summaries. Most of the summaries are more in the nature of a sampling of a program’s content, or a highlighting of its main features, rather than a full description of every single topic covered.

This index assembles the Vintage Vault programs into groups. The first part of the index groups the items by country, the second part by subject matter (see p. 33 for a list of all the subject matter categories). Many entries are indexed in more than one place. When you find something in the index that you want to check out, go to that program’s summary, read it, and play the program.

Index entries are generally arranged alphabetically under a country heading or subject-matter heading, but in some cases related entries are grouped together and listed chronologically. Because originally I prepared this index for my own use, the indexing can be a little idiosyncratic, so let your eye scan broadly over the page in order to catch all the entries that might interest you; or do a search of the text of the index.

There are three ways to find a particular program summary and its associated recording.

1. **Use the search box at the top of the Vintage Vault homepage.** It searches the text of the summaries, including program titles and broadcast dates (e.g. “MN.21.11.1999”). Scroll down to see the summary, and be sure to click “Read More” in order to see the full text.

2. **Do a PDF search of this index, or eyeball the country or subject-matter categories you are interested in.** After finding a program, look at the first column, “Date Posted,” and use that information in conjunction with the “Episodes/Archives” dropdown menu on the Vintage Vault homepage. The dropdown menu shows the summaries by the year and month they were posted to the website. The number shown in the first column of this index is also the date, that is, the year and month, that the program was posted to the website. An entry such as “MN1506-03” means that the program was posted in the year 2015, in the sixth month (June), and is the third program appearing in the June 2015 dropdown menu (counting from top to bottom).

3. **Use the second column of this index, “Broadcast Date.”** The date is shown in one of two formats, depending on when the summary was posted.

    a. For entries posted after 2016 (and regardless of broadcast date), the broadcast date is shown in
the format, “MN.15.06.1995,” meaning the 15th day of June, 1995, i.e. day-month-year. This is the numbering system that Jonathan uses. If you enter this number into the Vintage Vault search box you should find the program you want.

b. For entries posted in 2016 and before (and, again, regardless of broadcast date), the date is shown in a different format. For these entries, which are most of the entries in the index, I show the date in a six-digit, year-month-day format, e.g. 920305. To use one of these broadcast dates as a search term in the Vintage Vault search box you must first convert it to Jonathan’s style. So 920305 would convert to MN.05.03.1992, and if you then entered “MN.05.03.1992” in the search box you should find the program.

There are a small number of programs where the entry under “Broadcast Date” is just a year (“1996”), or a year and a month only (“9612”), or the entry is blank. In these cases I have included a search term (e.g. “Search: Latin American Clandestine Special”) that you can enter in the search box and that should get you to the right program. You must enter the search term precisely as shown, so pay attention to spelling, punctuation and spacing.

There are a few entries that are messages from Jonathan rather than recordings. These are marked “[no file].” I have added a search phrase for these as well.

Throughout the index I have included links to some relevant videos posted by Jonathan, but not every one. Jonathan’s full collection of videos is here.

I hope to update the index from time to time, and suggestions and corrections are welcome.
